

## DEMAGNETISATION APPARATUS DM SERIES Aperture Type

### MODEL - DM 22 Demagnetiser

Johnson & Allen Ltd, Neocol Works, Smithfield, Sheffield, S3 7AR  
Tel/Fax: 0114 273 8066 e-mail: [info@johnsonandallen.co.uk](mailto:info@johnsonandallen.co.uk)

- Powerful demagnetisation
- Controlled output
- Optional incorporation into automatic production lines
- In-situ demagnetisation with collapsing field
- Simultaneous demagnetisation of multiple small components
- RCD protection
- Continually rated
- Sizes to order
- Certified output
- Calibration & Service available

Johnson & Allen have over 50 years experience in the demagnetisation of components and structures.

The smallest of these demagnetisers starts with an aperture size of 70mm diameter and we have manufactured large units with apertures over 1m square.

Used throughout the automotive and aerospace industries in particular, the DM Series of demagnetisers provides a well-documented and established technique to remove unwanted residual magnetism.

In addition to our Standard Range, Johnson & Allen design specific systems for both magnetisation and demagnetisation.
