

PROFESSIONAL WHITE LIGHT INSPECTION TORCHES

RHOBUST – OUTPUT CERTIFIED

Spec applicable to both units

Over 8 hours continuous use on one charge.
Can be re-charged over 1000 times.
Output on minimum setting 2-3000 Lux
Output on maximum setting over 10,000 Lux

JW7622

Multipurpose inspection flashlight

- The fourth generation of environment-friendly and high power light source is applied with the features of high-brightness LED, low-energy-consumption light source, and work life up to 100 thousand hours .
- The reflector is designed with advanced surface processing technology and high reflection efficiency. The light features the illumination range up to more than 100 m and visible range up to 5000m.
- It is with the features of strong light, work light and quickflash as lighting or long-distance signal indication.
- The light is designed with inside circuit with the features of overcharging/over-discharging resistance and short circuit protective device and wrong switch operation resistant function.
- The housing is made of high rigidity of alloy ensuring strong impact resistant performance; It is also with the features of water-proof and high and low temperature resistant performance and good humanity, which can be used in various strict environment.
- Pyramid design for the top and can be used as protector for emergency.
- High-duty non-memory battery, with large capacity, low self discharging rate, and it is economic and environment-friendly.
- Its appearance is skidproof and elegant, light weight, portable and easy operational.
- Optional cold and warm light could be selected by user.

JW7620/TU

Solid miniature strong light explosion-proof flashlight

■ Structure Features

- It is with the features of the highest explosive-proof level, which can be used in combustible and explosive sites.
- The solid and maintenance-free LED light source is applied with the features of high light effect and long service life up to 100 thousand hours.
- It is designed with two modes of strong light and work light. Press button to switch them freely.
- It is with the features of humanistic battery level indication and low voltage warning function that allows you to check the battery level; when the battery level is low, the light will automatically remind you to start to recharge.
- It is made of light alloy with the features of strong collision and impact resistant performance, high and low temperature resistant performance and water-proof and dust-proof performance. It is used in various strict environment and climate.
- It is with the features of low battery level warning and auto low battery level protective function. When the battery level is low, the light will automatically flash for 20 times rapidly to remind you to start to recharge the battery. If it is used continuously, the light will automatically stop working in short time.
- It is also with the features of compact structure, small volume and light weight that allow you to bring it along in pocket.
